

Hello, my name is Fatma. I graduated from Faculty of Arts media department at Aswan University 2020, and I'm excited to apply for React Native Developer job.

As you know, in 2020, job opportunities were limited due to the pandemic, which prompted me to explore other career paths. I discovered my passion for programming and decided to pursue it further. I spent several months learning programming on my own, and eventually, I decided to join the Information Technology Institute (ITI) to formalize my education.

I enrolled in two tracks at ITI: first one was software development fundamentals track from November 2022 to February 2023, and the second frontend and cross-platform mobile development track from March 2023 to June 2023.

During my studies at ITI, I worked with a team on project called '3nile'. It's a platform where you can book boats for individual trips or group trips, and we also offer a service similar to SWVL, where you can book more than one seat for the desired location. We built the website using React JS, the dashboard with Angular, and the mobile application using React Native.

I'm passionate about Mobile Development and love creating visually appealing and user-friendly interfaces. My experience of working on '3nile' project make me confident that I would be a great fit for this role.

Thank you for considering my application, and I look forward to the opportunity to discuss my qualifications further.
