Dear Hiring Manager,

I am excited to apply for the Front End Engineer position with my extensive knowledge of HTML5, CSS3, Bootstrap, SCSS, JavaScript, ES6, Next.js, React.js, and React Native, along with my experience in backend development using SQL, PHP Native, and NoSQL, I am confident that I can make a valuable contribution to your team.

As a developer with experience in both front-end and back-end development, I have worked on a variety of projects that have given me a strong foundation in developing scalable and maintainable applications. I have over 3 years of experience in backend development using Node.js, designing and implementing scalable and secure server-side applications, as well as over 3 years of hands-on experience in Front-End development using React JS, creating responsive and user-friendly interfaces that adhere to modern design principles.

I am also well-versed in the MERN stack, having experience with MongoDB, Express, React, and Node.js, and I have knowledge of mobile app development using React Native. I am more than willing to undertake any coding test that may be required during the application process. As someone who thrives in challenging environments, I enjoy solving complex problems through coding and logical thinking. I am confident in my ability to deliver high-quality code within strict deadlines, ensuring the successful completion of projects.

I am physically located in Egypt and am able to travel for working abroad (I have previously lived in KSA and have valid Work Authorization). I am passionate about learning and collaborating with individuals from diverse backgrounds and am excited about the opportunity to contribute my skills and experience to your team.

Thank you for considering my application. I look forward to the opportunity to discuss my qualifications further.

Sincerely,

Fatma
